DETAILED ACTION

Claims 1-18, 20-22, 33, and 34 are pending in this application.

This action is in response to the applicants' amendment and reply filed on December 22, 2003.

Response to Arguments

Applicants' arguments and amendments filed on December 22, 2003 have been fully considered but they are not persuasive. Rejections of Claims under 35 U.S.C. § 112, second paragraph, and 103(a) are maintained.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

The rejection of claims under 35 U.S.C., 112, second paragraph, is hereby withdrawn in view of applicant's arguments.

Claim Rejections - 35 USC § 102

The rejection of claims under 35 U.S.C., 112, second paragraph, is hereby withdrawn in view of applicant's amendments.

Claims 1,2, 10, 11, 14, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Plantier et al., Chem Abstract CA64:1906b. The instantly claimed compounds read on the reference compound, see the enclosed copy of CAPLUS

Art Unit: 1624

computer search report and the compound having RN 6829-35-2, i.e., R1 and R3 are H, Z is NR13R14.

Claim Rejections - 35 USC § 103

Claims 1, 2, 8-16, 20, 21 remain rejected and claims 33 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neuenschwander et al. Applicants' arguments have been fully considered but they are not persuasive. Applicants argue that the instant claimed compounds have different utilities from the reference compounds and none of applicant' compounds is specifically disclosed in the reference. While it is true that the compounds have different utilities, the instant claims are all directed to compounds not utilities, i.e., methods of use. Although the Neuenschwander reference lacks specific examples of compounds, the generic teaching of the reference embraces the instantly claimed compounds. By disclosing that A can be imidazole, piperidine, piperazine, etc., the reference suggests that changing A from a bridged bicyclic ring to an imidazole, piperidine, piperazine would provide the same results for the biological activities of the compounds, namely their use as squalene synthase inhibitors. Thus, it would have been obvious to one skilled in the art at the time of the invention to modify any of the species of the genus taught by the reference including those instantly claimed, because the skilled chemist would have the reasonable expectation that the known compounds in the reference would retain their activity.

The rejection of claims over the Connor reference (WO 98/06703) is hereby withdrawn in view of applicant's amendments.

Conclusion

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
